✦ **sugar effect**

Sugar finish tiles come with *grainy finish* that is applied through a unique manufacturing process.

Tiles with different slip resistance ratings are suited to specific areas:

- **R9 Slip Resistance:** Suitable for dry indoor spaces (e.g., living rooms, bedrooms). Not ideal for wet areas like bathrooms unless a bath mat is used.
- **R10 Slip Resistance:** Provides more grip, suitable for areas prone to splashes (e.g., kitchens, cloakrooms). Still requires a bath mat in bathrooms with excessive water.
- **R11 - R12 Slip Resistance:** Suitable for both indoor and outdoor use, especially in wet areas like bathrooms and wet rooms. Porcelain is recommended for outdoor durability.

P.E.I

- P.E.I. ①** These tiles are suitable only for locations where softer footwear is worn or where shoes are not frequently used (i.e. residential bathroom or other areas with light traffic). PEI 1 rated tiles can also be used for interior commercial and residential walls.
- P.E.I. ②** These tiles are suited for areas subjected to general residential traffic – areas that are walked on by soft soled or 'normal' footwear with very small amounts of scratching dirt. Tiles classified as PEI 2 are not suitable for kitchens, entrance halls, stairs and other areas subjected to heavy traffic.
- P.E.I. ③** Tiles that are classified as PEI 3 are suited for all residential and light commercial areas such as offices, reception areas, boutiques, interior walls, countertops and residential bathroom floors. They are not however recommended for use in lobbies or entryways in commercial properties.
- P.E.I. ④** Tiles with a PEI rating of 4 are suited for installations that are subjected to regular levels of foot traffic. Recommended for medium commercial and light institutional use, such as restaurants, hotels, hospital lobbies and corridors.
- P.E.I. ⑤** These tiles are suitable for areas required to endure heavy foot traffic, abrasive dirt and moisture, and where safety and maximum performance are required. Tiles with this PEI rating are often found in shopping centres, public buildings, leisure centres, airports, and swimming pools.
